KU Office of Research Pre-Award Services provides this select compilation of funding opportunities as a resource for University of Kansas Researchers. We encourage you to utilize the campus subscription to PIVOT to find funding opportunities specifically tailored to your research area based on keywords you provide. PIVOT is easy to use and offers other valuable services that are helpful to researchers. Access is available at this site: https://pivot.cos.com

If you have questions regarding *PIVOT*, please contact Megan Todd (megantodd@ku.edu, 4-7782).

Upcoming Funding Events/News

National Institutes of Health (NIH)
Registration now open for NIH Regional Seminar on Program Funding and Grants Administration May 3-5, 2017 in New Orleans, LA
The NIH Regional Seminar offers a comprehensive program for the NIH extramural community about the NIH grants process and related policies, including such topics as fundamentals of the NIH, compliance, peer review, grant writing for success, pre-award and post-award issues for administrators and investigators, animal and human subject research, and how to interact electronically with NIH. In addition to a strong, track for of sessions for administrators, a track for new investigators will provide step-by-step guidance on mapping your career, an understanding of the funding process and what can be expected up to the time of award.
For more information, see https://grants.nih.gov/grants/guide/notice-files/NOT-OD-17-039.html

National Science Foundation (NSF)
Division of Mathematical Sciences Graduate Internship Program
This program will provide an opportunity for mathematical sciences doctoral students to participate in internships at federal national laboratories, industry and other approved facilities. Participation in an internship will provide first-hand experience of the use of mathematics in a nonacademic setting. The internships are aimed at students who are interested in understanding the application of advanced mathematical and statistical techniques to "real world" problems, regardless of whether the student plans to pursue an academic or nonacademic career.
For more information, and to apply, see http://www.orise.orau.gov/nsf-msgi/default.html

Request for Information on Future Needs for Advanced Cyberinfrastructure to Support Science and Engineering Research (NSF CI 2030)
NSF invites both individuals and groups of individuals to provide input on the specific scientific and engineering research challenges that require advanced cyberinfrastructure for their solutions, via the following submission website: **http://www.nsfci2030.org**. Contributions must be made using the submission website http://www.nsfci2030.org **on or before 5:00 PM Eastern time on April 5, 2017**.

Pre-Award Services: Email: kucrpremgmt@lists.ku.edu or nbiles@ku.edu; Phone: 864-7434
Research Development: Email: researchdevelop@ku.edu; Phone: 864-3289

Respondents will be asked the following questions:

- Question 1 (maximum 1200 words) – Research Challenge(s). Describe current or emerging science or engineering research challenge(s), providing context in terms of recent research activities and standing questions in the field.
- Question 2 (maximum 1200 words) – Cyberinfrastructure Needed to Address the Research Challenge(s). Describe any limitations or absence of existing cyberinfrastructure, and/or specific technical advancements in cyberinfrastructure (e.g. advanced computing, data infrastructure, software infrastructure, applications, networking, cybersecurity), that must be addressed to accomplish the identified research challenge(s).
- Question 3 (maximum 1200 words, optional) – Other considerations. Any other relevant aspects, such as organization, process, learning and workforce development, access, and sustainability that need to be addressed; or any other issues that NSF should consider.
- NSF anticipates making submissions publically accessible through an NSF CI 2030 website.

For more information, see the Dear Colleague letter at
