KU Office of Research Pre-Award Services provides this select compilation of funding opportunities as a resource for University of Kansas Researchers. We encourage you to utilize the campus subscription to PIVOT to find funding opportunities specifically tailored to your research area based on keywords you provide. PIVOT is easy to use and offers other valuable services that are helpful to researchers. Access is available at this site: https://pivot.cos.com

If you have questions regarding PIVOT, please contact Megan Todd (megantodd@ku.edu, 4-7782).

**KU Office of Research Pre-Award Services**

**Streamlyne Implementation**

The Office of Research and KU IT are pleased to announce a partnership with Vivantech to launch Streamlyne Research this summer as the pre-award system of record for all sponsored project proposals. Vivantech is a technology firm specializing in the higher education and research institution sector for nearly 15 years, and Streamlyne Research is its flagship offering.

Streamlyne was selected to replace the database functionality of the PeopleSoft Grants proposal module that will be decommissioned on July 1, 2017. In addition, Streamlyne will be used for System-to-System proposal submission to federal sponsors, proposal approval routing, and proposal document storage. Combining these services into one integrated system promises to promote efficiency, accuracy and transparency.

We expect that the implementation of Streamlyne will necessitate some changes in pre-award business processes. As we plan for this transition, we will endeavor to keep the research community informed and engage their feedback through a variety of venues, including the following:

- Updates will be posted to [http://research.ku.edu/streamlyne_implementation](http://research.ku.edu/streamlyne_implementation)
- Thursday Research Topics (TRT) presentation in April
- In person information/training sessions for Principal Investigators in late April
- Grant Coordinators May meeting
- Updates included in this bulletin
National Institutes of Health (NIH)

NIH Operates Under a Continuing Resolution

The Department of Health and Human Services (HHS), including NIH, is operating under a continuing resolution (CR) that continues government operations through April 28, 2017 at 99.8099 percent of the FY 2016 enacted level (NOT-OD-17-048).

Continuing the procedures identified under NOT-OD-17-001 and NOT-OD-16-046 and consistent with NIH practices during the CRs of FY 2006 – 2016, the NIH will issue non-competing research grant awards at a level below that indicated on the most recent Notice of Award (generally up to 90% of the previously committed level). Upward adjustments to awarded levels will be considered after FY 2017 appropriations are enacted, but NIH expects institutions to monitor their expenditures carefully during this period.

All legislative mandates that were in effect in FY 2016 (see NOT-OD-16-044 and NOT-OD-16-048) remain in effect under this CR.

Per NOT-OD-17-049, the salary limitation set at Executive Level II of the Federal Pay Scale, was increased from $185,100 to $187,000, effective January 8, 2017.

The Ruth L. Kirschstein National Research Service Award postdoctoral stipend levels and tuition/fees for FY 2017 are described in NOT-OD-17-003. Until further notice, the undergraduate and predoctoral stipends and tuition/fees will remain at the levels announced in NOT-OD-16-062.

Reporting Preprints and Other Interim Research Products

Interim Research Products are complete, public research products that are not final. The NIH encourages investigators to use interim research products, such as preprints, to speed the dissemination and enhance the rigor of their work.

- Awardees are not required to create interim research products through their NIH award.
- Applicants are not required to cite interim research products as part of their grant applications.
- Since preprints are not published in peer-reviewed journals, they do not fall under the NIH public access policy.
- This guide notice does not apply to clinical trial registration. See ClinicalTrials.gov about registration of clinical trial protocols.

Interim research products can be cited anywhere other research products are cited. These sections include the following:

- R&R Other Project Information Form, Bibliography & References Cited
- R&R Senior/Key Person Profile (Expanded) Form, Biographical Sketch
- PHS 398 Research Plan, Progress Report Publication List
- PHS 398 Career Development Award Supplemental Form, Progress Report Publication List
- PHS Fellowship Supplemental Form, Progress Report Publication List
- RPPR, section C – Products

Pre-Award Services: Email: kucrpremgmt@lists.ku.edu or nbiles@ku.edu; Phone: 864-7434
Research Development: Email: researchdevelop@ku.edu; Phone: 864-3289
To cite the product, applicants and awardees must include the Digital Object Identifier and the Object type (e.g. preprint, protocol) in the citation. Also list any information about the document version (e.g. most recent date modified), and if relevant, the date the product was cited.
For more details, see NOT-OD-17-050.

National Science Foundation (NSF)
NSF updates FAQs about public access to research results
The National Science Foundation (NSF or Foundation) has developed a plan entitled "Today's Data, Tomorrow's Discoveries," consistent with the objectives set forth in the Office of Science and Technology Policy's Feb. 22, 2013, memorandum, "Increasing Access to the Results of Federally Funded Research," and with long-standing policies encouraging data sharing and communication of research results.
As outlined in the plan, NSF requires that either the version of record or the final accepted manuscript in peer-reviewed scholarly journals and papers in juried conference proceedings or transactions must:
• Be deposited in a public access compliant repository designated by NSF;
• Be available for download, reading and analysis free of charge no later than 12 months after initial publication;
• Possess a minimum set of machine-readable metadata elements in a metadata record to be made available free of charge upon initial publication;
• Be managed to ensure long-term preservation; and
• Be reported in annual and final reports during the period of the award with a persistent identifier that provides links to the full text of the publication as well as other metadata elements.
This NSF requirement applies to new awards resulting from proposals submitted, or due, on or after the effective date of the Proposal & Award Policies & Procedures Guide (PAPPG) issued on January 25, 2016. Updated FAQs are available at NSF 17-060.

Removal of Deadlines for the Following Programs in the Division of Earth Sciences (EAR):
Tectonics, Petrology and Geochemistry, Geophysics, and EarthScope
Although summer deadlines for these programs have been traditionally earlier, submission of new proposals should be submitted only after July 24, 2017. This date was selected to mitigate delays that might be associated with relocation of the NSF staff and services to a new headquarters building in Alexandria. The Program Solicitations for each of the programs listed above will be updated to reflect these changes. It should be noted that EAR intends to sunset the EarthScope Science program at the end of fiscal year 2018 and, therefore, proposals will not be accepted by this program after February 10, 2018.
We remind our community that proposals that have been declined need to be substantially revised to be considered again by the programs. Submissions that have not been changed significantly will be returned without review as outlined in the NSF’s PAPPG. For more information, see NSF 17-067.
