KU Office of Research Pre-Award Services provides this select compilation of funding opportunities as a resource for University of Kansas Researchers. We encourage you to utilize the campus subscription to PIVOT to find funding opportunities specifically tailored to your research area based on keywords you provide. PIVOT is easy to use and offers other valuable services that are helpful to researchers. Access is available at this site: https://pivot.cos.com

If you have questions regarding PIVOT, please contact Dan Coonfield (dcoonfie@ku.edu, 4-7404).

**Upcoming Funding Events/News**

**National Science Foundation (NSF)**

**Change in Eligibility to the NSF Graduate Research Fellowship Program (GRFP)**

Effective as of the 2017 competition (Fall 2016 deadlines), NSF will limit graduate students to only one application to the GRFP, submitted either in the first year or in the second year of graduate school. First-year graduate students in Fall 2015 who applied to the 2016 GRFP competition will be allowed to apply a second time in Fall 2016, if they are otherwise eligible. All other graduate students are subject to the new eligibility requirements. No change is made to the eligibility of undergraduates, of bachelor’s degree holders without any graduate study, or of individuals who have had an interruption in graduate study of at least two consecutive years. GRFP continues to identify and to inspire the diverse scientists and engineers of the future, and especially encourages women, members of underrepresented minority groups, persons with disabilities, and veterans to apply. This change in eligibility should result in more individuals applying as undergraduate students who have not yet made the commitment to go to graduate school. This is a more diverse population than admitted graduate students. Please see NSF 16-051, Frequently Asked Questions (FAQs), for more information.

**NSF/SBE Partnering in Round 4 of the Digging into Data Challenge**

The National Science Foundation's Directorate for Social, Behavioral & Economic Sciences is partnering in the Trans-Atlantic Platform 2016 Digging into Data Challenge (T-AP DiD), a grant competition open to international, collaborative projects that address research questions in humanities and/or social science disciplines by using new, large-scale, digital data analysis techniques. The opportunity is open to international projects that consist of teams from at least three participating T-AP Digging into Data countries, and must include partners from Europe and the Americas. Research partners will receive funding from their own national funding agencies for projects of up to 36 months in duration. Additional information about this transatlantic funding opportunity — including links to application details — will be available on the DiD application website as of March 1, 2016. Interested researchers should review the website for details about the competition and see the list of previous awards on the site for information as to what research areas have been supported in previous rounds. Questions should be directed to the NSF program officer for the T-AP Digging into Data Challenge, Joan Maling.
