Accessing Your IRB Studies in eCompliance

1. To access your study in eCompliance, first, go to ecompliance.ku.edu. Enter in your KU ID and password. If you are having log-in issues, please consult HRPP via email.

2. Once you’re logged in, eCompliance will automatically default you to your inbox. The projects in your inbox require action from you in some way. For example, if you have to respond to clarifications from HRPP, you will be able to find the study here.
3. To view your active studies, click on “IRB” in red banner at the top of the page.

4. The “In-Review” tabs show any projects that you are currently under IRB review. It will show both projects where you are listed as the Principal Investigator, and projects where you are listed a study team member.
5. By clicking on the “Active” tab, you can access any studies that are currently approved by the IRB. 
   Note: To access studies that have been closed you can click the “Archived” tab. The “New Information Reports” tab will give you access to RNI’s, and the “All Submissions” tab lists all submissions in-review, active, archived, or RNI’s.

6. By clicking on the study, you can view the approval date and expiration date and any documents associated with the project. This is also where you will need to start a modification and/or a continuing review.
   Note: Projects that were approved before the eCompliance launch date (July 17, 2013) will not show study documents, unless they were added by the Principal Investigator in a modification.
